New Release
Aircraft Design: A Conceptual Approach
Fifth Edition by Daniel P. Raymer

The World's #1 Source for Aerospace Information

AIAA is the premier provider of information on aerospace technology, engineering, and science. Our titles document the most important developments and the latest research in air and space history. Our publications make the exchange of technical knowledge and information possible among aerospace professionals.

AIAA Journal

This Journal is devoted to the advancement of the science and technology of astronautics and aeronautics through the dissemination of original archival research papers disclosing new theoretical developments and/or experimental results. The topics include aeroacoustics, aerodynamics, combustion, fundamentals of propulsion, fluid mechanics and reacting flows, fundamental aspects of the aerospace environment, hydrodynamics, lasers and associated phenomena, plasmas, research instrumentation and facilities, structural mechanics and materials, optimization, and thermomechanics and thermochemistry. Papers also are sought which review in an intensive manner the results of recent research developments on any of the topics listed above

Guidance, Navigation, and Control Conferences

The AIAA Guidance, Navigation, and Control Conferences, provide the world's preeminent science, research, and technology. It brings together experts from around the world to provide a high level to cover a broad spectrum of topics including simulation, information systems, and autonomous vehicles.
